HeliFast[®] Bimetal

1 Strong Torisional Result

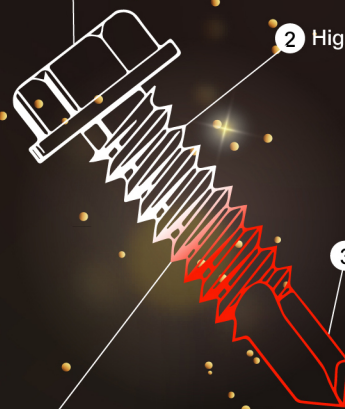

2 High Corrosion Resistance

3 Advanced Drilling Speed

4 Enhanced Welding Quality

Flexible Lead Time

Innovative Production Technology

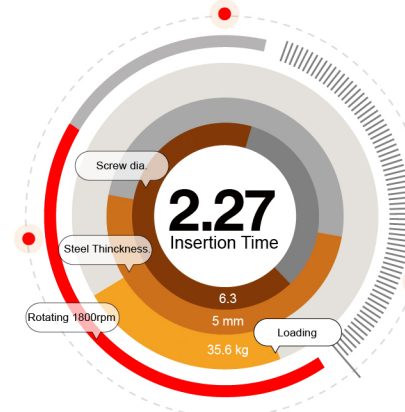

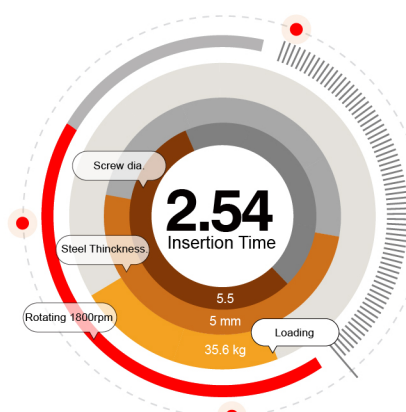

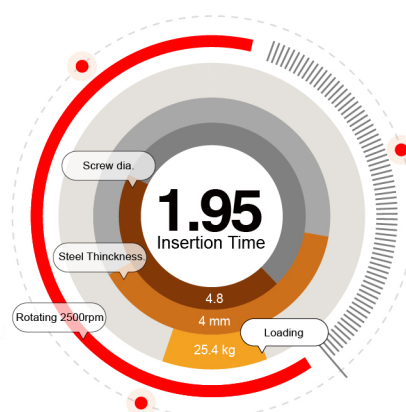

Ingenuity of Fastener For Metal Construction

HeliFast® Bimetal Series

Bi-metal screw, an exceptional product of the advanced technique. The combination of stainless and carbon steel maximizes the potential usage of the product itself. On top of the above, our advanced production technique enhances both drilling and torsional performances.

Advanced Drilling Speed

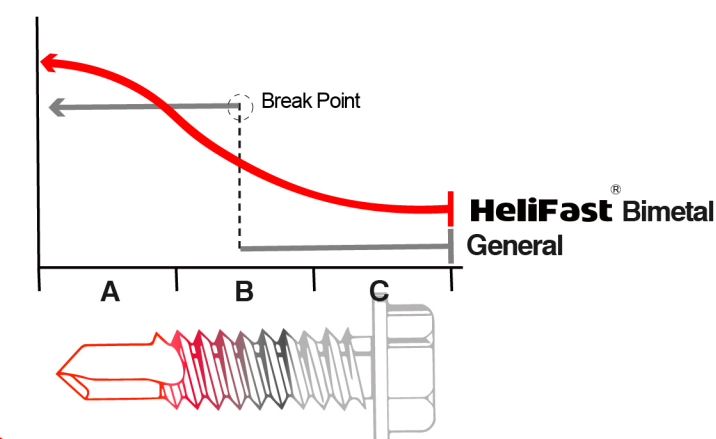

Strong Torisional Result

Screw dia	Torque(kg/cm)	
4.8 (min)	Bimetal	55+
	Other brand	49.98
5.5 (min)	Bimetal	95+
	Other brand	75.48
6.3 (min)	Bimetal	140+
	Other brand	110.16

Enhanced Welding Quality

Flexible Lead Time
Innovative Production Technology

About

Drawlin Industry Co., Ltd, founded in 1995 by Bill Cheng, started with specializing screw molding. Throughout the successful achievements and the positive relationships with the clients, we aim to keep innovating and improving as a whole. The integration of arts and science is involved in our research and development. Meanwhile, a new business model was introduced to provide better customer service as well as product values.

New Era, New Challenge

1995: Drawlin Industry Co., Ltd was founded by 5 employees with five million NTD capital

1996: Drawlin introduces 3D CAD/CAM for graphic design

1998: Drawlin invents the high-speed cutting technique and center-point die

2005 Drawlin transits into a technical service company, makes a few attempts on screw production as well as the marketing. Meanwhile, the ERP system was introduced.

2008: Drawlin begins the development of the Bi-Metal Screws production

2009: Super DPD Co., Ltd., a screw manufacturing company was established. ISO 9001:2008 MANAGEMENT SYSTEM was awarded

2012: Jiashan Drawlin Precision Mold Co., Ltd was established for the Chinese domestic market

2015: Drawlin introduces the technique of 3D printing. Simultaneously, the EN14566 CE authentication was acquired.

2013: Super DPD launches a new wooden screw, Gearky. It reduces the resistance and turning force while drilling into the wooden surface

2017: Super-DPD launches a new drill point, HeliFast. Heavy and Light, Both Fast.

Stability

Short Delivery Time is Guaranteed with Our Continuous Innovation.

Bi-Metal screw, acquires the advantages of both steel, therefore, optimizes the screw to its maximum usage. The upper part of the screw is made of stainless steel, which offers great corrosion resistance. Furthermore, the bottom part is made of carbon steel, and that provides a better drilling performance. To combine them as one, we have our superior welding technique to bond them together.
