# HeliFast®

## Heavy and Light Both Fast

By applying driving mechanism to the drill point of the screw along with machining allowance, it allows high drill speed at low loading effort, which improve working efficiency and performance; it also overcome inconvenient footholds at construction site such like scaffolding working and ease working condition.

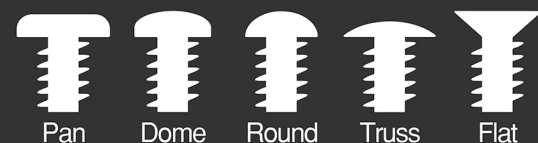

# HeliFast®

Heavy and Light Both Fast

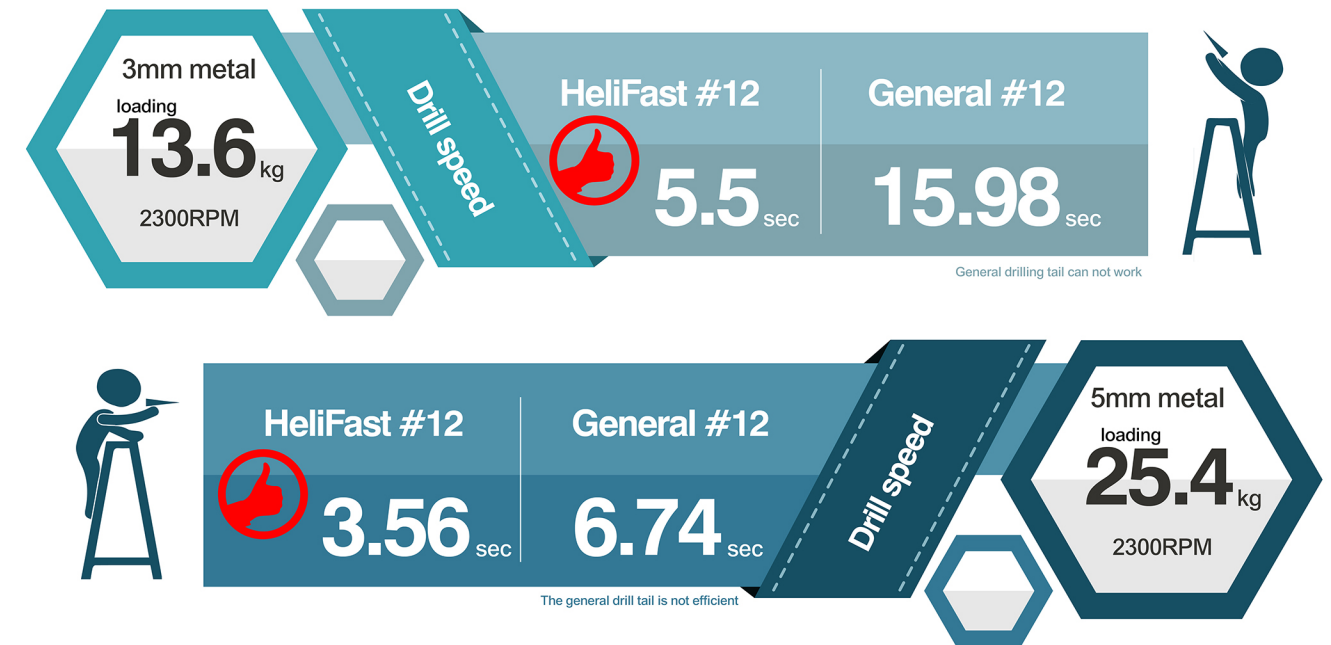

## Ingenuity of Fastener for Metal Construction

HeliFast's drill point was modified by driving mechanism and extra space for machining allowance, it greatly reduces working time and boosts working efficiency. It functions uniquely at scaffold, where hand force is difficult to apply. It allows high drill speed with low loading effort, which also overcomes the limits of electric tools.

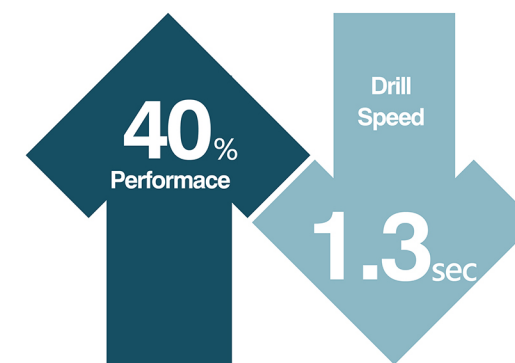

### Head Styles

### No restriction at working angle

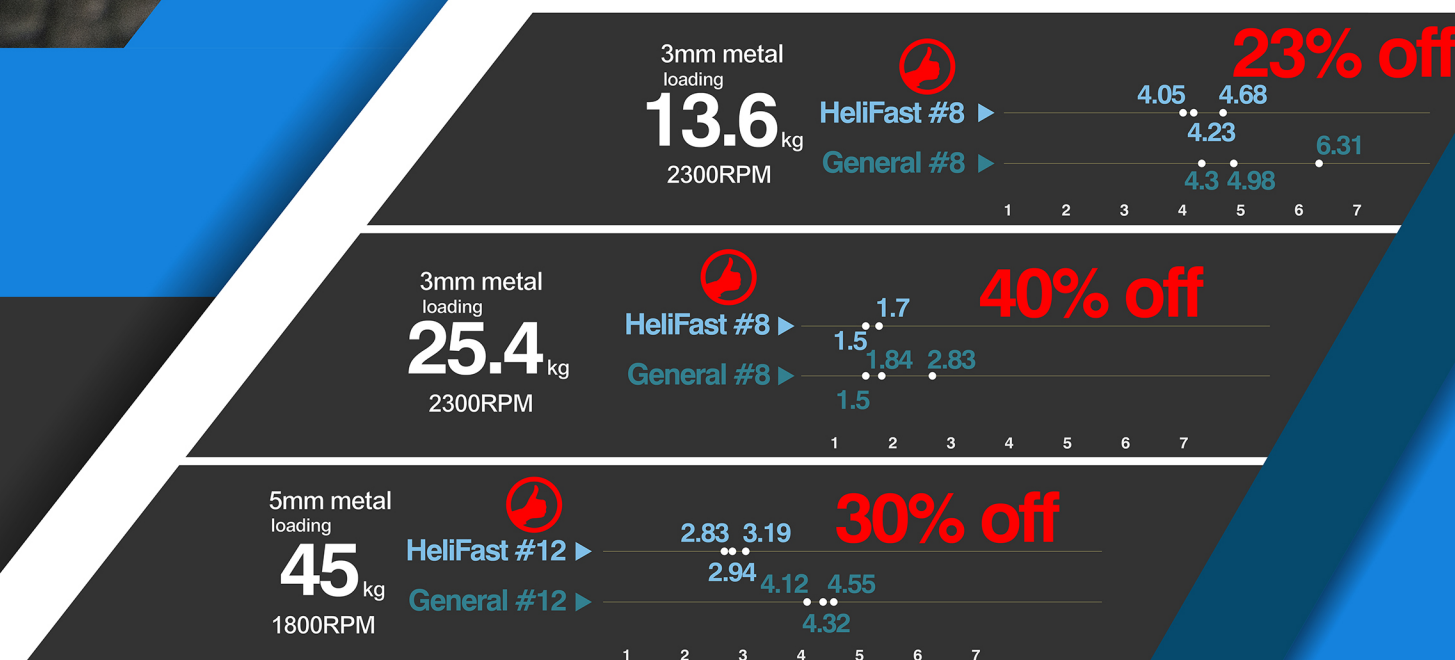

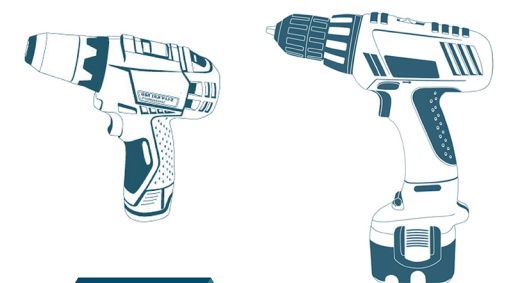

### Improve 40% working efficiency

### Easy screw-in at low RPM

But also capable at high drill speed up to 4000 RPM

# About

Founded in 1995 by Bill Cheng, Drawlin Industry Co., Ltd. started with specializing in screw molding; throughout the past score, trust from customers worldwide were accumulated. Innovation and improvement were never stopped. Integration of art and science was considered during research and development. New business model was introduced to provide better customer service and values.

New era, New challenge

1995: Drawlin Industry Co., Ltd was founded with five million NTD capital with only five employees.

1996: Introduced 3D CAD/CAM for graphic design.

1998: Invent high speed cutting technique and center-point die.

2005: Transformed into technical service company, made a few attempts on screw producing and marketing. Meanwhile ERP system was introduced.

2009: Screw manufacture company Super DPD Co., Ltd was established. ISO 9001:2008 MANAGEMENT SYSTEM was introduced.

2012: Jiashan Drawlin Precision Mold Co., Ltd. was established for China domestic market.

2015: Introduction of the 3D printing improves our response to optimize customers needs. Simultaneously, we acquired the EN14566 CE authentication.

2017: The launch of HeliFast.

# Stability

Our perfectionism on quality and service is not compromisable.

The investment on precision instruments allows us to achieve our fastidious self-demands. Our products are qualified with several European patent and authentication.

Besides, with continuous improvement on production, on time delivery with competitive price are guaranteed.
